

25/11/2016 – Joint Event Hosted by FOCUS and the 4ZDM Cluster

On 24 November, the FOCUS partners and the 4ZDM Cluster hosted an event in Brussels titled, “FOCUS Demo of how to sustain and implement new members in a project cluster”.

With 20 attendees, including co-ordinators from former 4ZDM cluster projects, co-ordinators of new cluster projects, representatives from EFFRA and the EC, the workshop was a practical session aimed at demonstrating and testing the FOCUS outcomes.

Objectives of the workshop:

- Show the impact of FOCUS outcomes on FoF related clusters/projects.
- Enlargement of 4ZDM cluster with new recently-born projects (under FoF-3-2016).
- Demonstration and testing of clustering & exploitation methodologies (developed in FOCUS) at ZDM framework: from bottom-up to top-down.
- Help clarify the “big picture” of results/outcomes/toolkit of the 5 CSAs for FoF community, related to clustering & exploitation.

The 4ZDM cluster is growing with five new projects and two of them will use the FOCUS Cluster Methodology.
